

# Battery Management Solutions for Point-of-Sale Systems

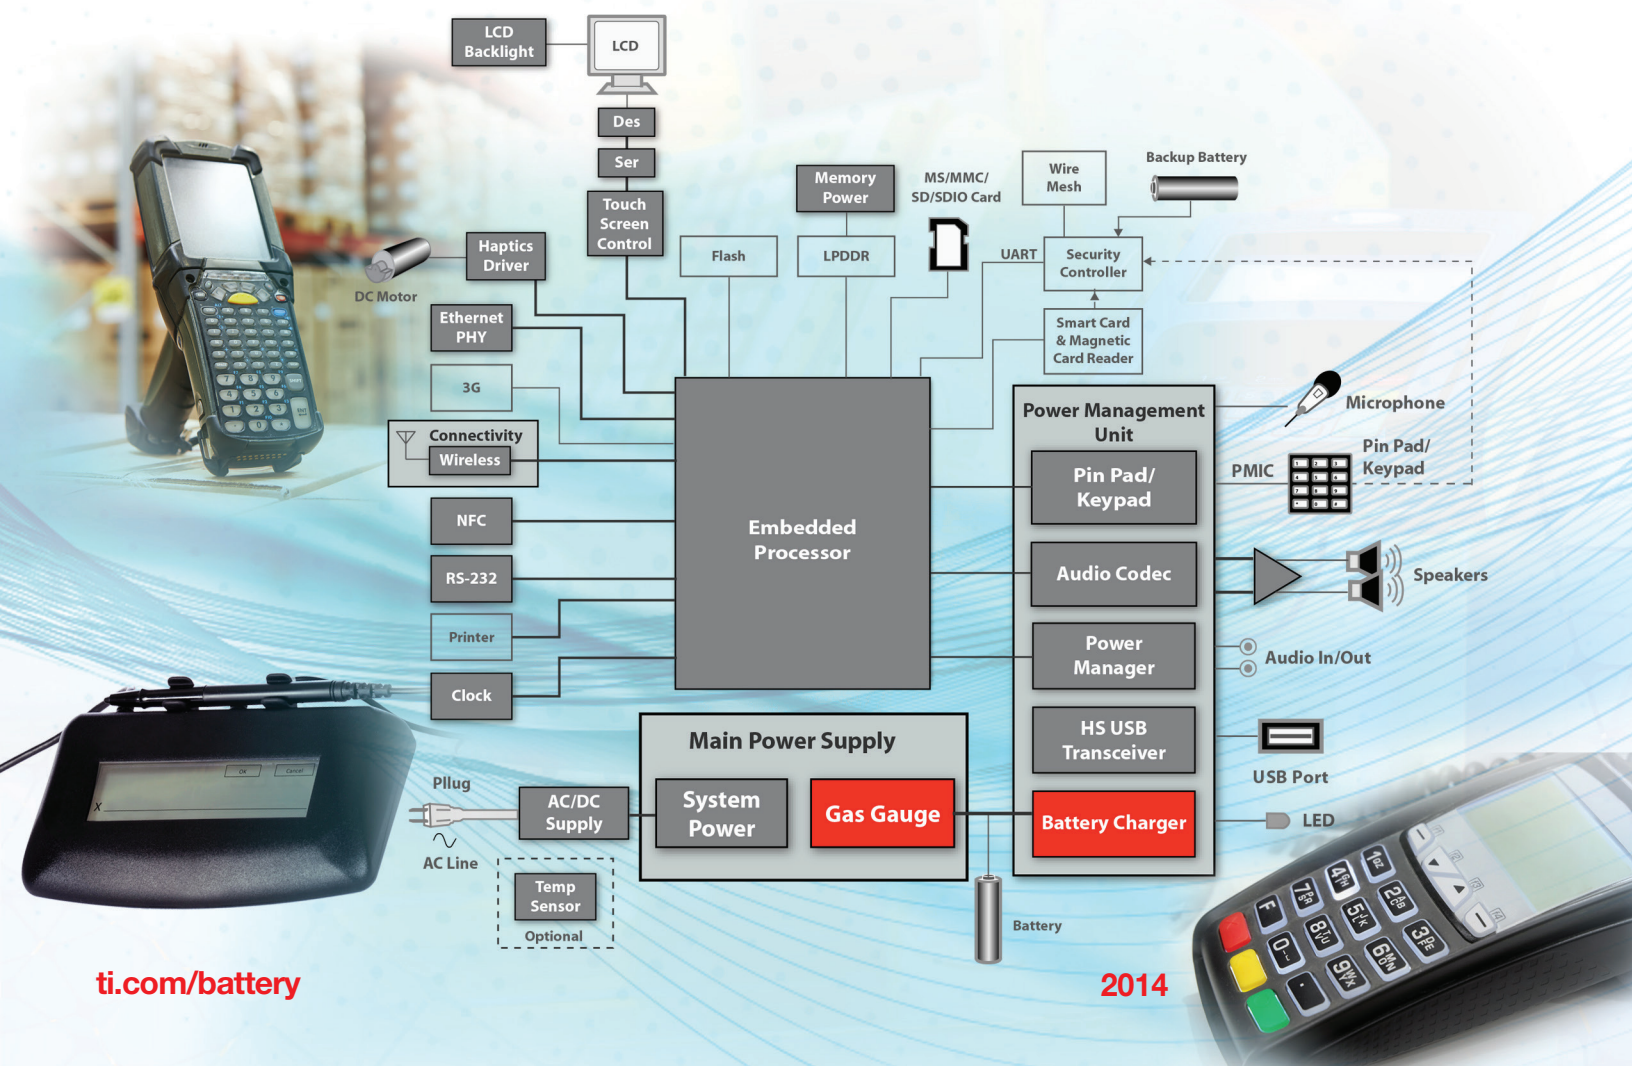

## Overview

Retail, hospitality, and banking industry transactions processed by electronic Point-of-Sale (POS) equipment including card payment terminals and readers, pin entry devices, and handheld printers depend on accurate and reliable battery life. Texas Instruments provides high-performance battery management technologies with reliable, scalable, and power-efficient solutions for simple and complex POS systems alike. TI's space saving chargers, Impedance Track™ fuel gauges, standards-compliant wireless charging ICs, and Energy Harvesting solutions help portable POS systems by increasing runtime and allowing faster and cooler charging to simplify the design process and get to market faster.

## Broadest Portfolio of Battery Management ICs

- Chargers, Fuel Gauges, Protection and Authentication ICs
- Smallest footprint, space-saving solutions for small form factors
- Very high-efficiencies allow more heat dissipation and longer battery run-time
- Reference designs, evaluation boards, and design tools available for rapid prototyping

# Battery Management Solutions for Point-of-Sale Systems

## Featured Chargers

Device	Features and Benefits	Evaluation Modules
<b>bq24133</b>	Synchronous switch-mode Li-Ion and Li-Pol stand-alone charger with 2.5A integrated N-MOSFETs	bq24133EVM-715, 5V and 15V versions
<b>bq24103A / bq24105</b>	Highly-integrated synchronous switch-mode, Li-Ion and Li-Pol with Integrated 2A Power FETs	bq24103AEVM, bq24105EVM
<b>bq24600</b>	Standalone synchronous switch-mode Li-Ion or Li-Pol charger with low Iq	bq24600EVM
<b>bq24610</b>	Standalone synchronous switch-mode Li-Ion and Li-Pol charger with system power selector, low Iq	bq24610EVM, bq24610EVM-603
<b>bq24040 / bq24090</b>	1A, single-cell Li-Ion and Li-Pol charger	bq24040EVM, bq24090EVM
<b>bq24072 / bq24073</b>	1.5A USB-friendly Li-Ion charger and power-path management IC	bq24072EVM, bq24073EVM
<b>bq24250</b>	2A I <sup>2</sup> C or standalone switch-mode Li-Ion charger with power-path management	bq24250EVM
<b>bq24296 / bq24297</b>	I <sup>2</sup> C-controlled 3A single-cell USB charger with power-path management and USB OTG	bq24296EVM-021, bq24297EVM-021
<b>bq2000</b>	Programmable NiMH / NiCd fast-charge management IC	bq2000
<b>bq51025</b>	10W Qi-compliant single chip wireless power receiver	bq51025EVM-649
<b>bq500215</b>	10W Qi-compliant wireless power transmitter manager	bq500215EVM-648

## Featured Gauges, Protection, Monitors

Device	Features and Benefits	Evaluation Modules
<b>bq27411-G1</b>	Pack-side Impedance Track™ “light” fuel gauge and external I <sub>sense</sub> resistor	bq27411EVM-G1C, bq27411EVM-G1B
<b>bq27421-G1</b>	System-side Impedance Track fuel gauge with integrated sense resistor	bq27421EVM-G1A, bq27421EVM-G1B
<b>bq27441-G1</b>	1S, system-side Impedance Track fuel gauge	bq27441EVM-G1A, bq27441EVM-G1B
<b>bq27520-G4</b>	System-side Impedance Track programmable fuel gauge	bq27520EVM
<b>bq27541-G1</b>	Single-cell pack-side Li-Ion Impedance Track fuel gauge	bq27541EVM
<b>bq27621-G1</b>	System-side Impedance Track fuel gauge, no sense resistor required	bq27621EVM-G1
<b>bq27545-G1</b>	Single-cell pack-side Li-Ion fuel gauge in WCSP package	
<b>bq20Z45-R1</b>	SBS 1.1-compliant Impedance Track gauge and protector	
<b>bq20Z65-R1</b>	SBS 1.1-compliant Impedance Track gauge and protector, JEITA Compliant	bq20Z65EVM
<b>bq3060</b>	SBS 1.1-compliant gauge and protector with CEDV	bq3060EVM

## Design Resources

Product	Description
<b>Design Tools</b>	bqStudio software universal development platform, includes gauging in five clicks. Available at <a href="http://ti.com/batterytools">ti.com/batterytools</a>
<b>Reference Designs</b>	Reference design library for battery-powered devices feature gauges, chargers, protection and AFE designs. Search battery management designs at <a href="http://ti.com/tidesigns">ti.com/tidesigns</a>
<b>Development Kits</b>	See complete listing at <a href="http://ti.com/batterytools">ti.com/batterytools</a>
<b>Technical Training</b>	Available on-demand at <a href="http://ti.com/battery">ti.com/battery</a> . Battery Management University courses and Getting Started content in multiple languages
<b>System Block Diagrams</b>	Electronic POS applications, available at <a href="http://ti.com/pos">ti.com/pos</a>

## Chargers

- Faster, cooler charging
- 196 devices
- Energy Harvesting and Wireless Power options

## Cell Monitor and Balancer

- Helps bring cells back to balance
- Overcharge, over-discharge, overtemperature protection

## Authentication

- Performance and safety benefits for demanding systems
- For batteries and peripherals

## Gauges

- Reports state of charge and state of health
  - 99% accuracy with Impedance Track™
  - Extends runtime and lifetime

## Protection

- Independent cell, voltage, and temperature protection
- Secondary protector integrates comparators for overvoltage, undervoltage, overtemperature

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
